TEJA REDDY PALLE

Title: Associate Consultant / SDET
Location: Austin, TX, USA

Experience Summary

- Software Development Engineer in Test (SDET) with 3+ years of experience in Quality Assurance, Test Automation, API Testing, Database Testing, and End-to-End Quality Engineering across Financial Services, Insurance, and Enterprise Applications.
- Extensive experience designing and maintaining automation frameworks using Playwright with TypeScript and Selenium WebDriver with Java.
- Hands-on expertise in REST API Testing using Postman and Swagger, including request/response validation, business rule verification, and service integration testing.
- Strong database testing experience using SQL and PostgreSQL for backend data validation, data integrity verification, and reconciliation across UI, API, and database layers.
- Experience working within Agile/Scrum environments, participating in sprint planning, test execution, release validation, defect management, and production support activities.
- Strong knowledge of AI-assisted testing approaches including AI-driven test design, test optimization, intelligent test generation, API Genie, and Model Context Protocol (MCP) integrations.
- Proven ability to collaborate with Product Owners, Business Analysts, Developers, and QA teams to ensure high-quality software delivery.

KEY SKILLS

Programming Languages	Java, TypeScript, JavaScript, SQL
Test Automation	Playwright, Selenium WebDriver, TestNG, Cucumber (BDD), Page Object Model, Hybrid Framework, Data Driven Testing
API Testing	REST APIs, Postman, Swagger/OpenAPI, API Automation, Request & Response Validation
Database	PostgreSQL, SQL, Database Validation, Data Integrity Testing
Testing Types	Functional, Regression, Smoke, Sanity, Integration, End-to-End, System, UAT
Tools	JIRA, Zephyr, Confluence, Git, Jenkins, Maven, qTest
CI/CD	Jenkins, Git, GitLab CI
Methodology	Agile, Scrum, SDLC, STLC
Business Applications	ClientWorks, AccountView, Guidewire PolicyCenter
AI & Automation	AI-Assisted Testing, API Genie, MCP, AI-Based Test Optimization

Professional Experience

1] Organization Name – Capgemini America Inc.
Client Name – LPL Financial
Project – Clientworks and Accountview Automation
Project Duration – March 2026 – Oct 2026
Role/ Title – SDET
Work - Austin, TX
Project Description
ClientWorks and AccountView are financial services platforms used to manage customer accounts, investments, and advisor workflows. The applications support critical financial operations requiring end-to-end validation across user

interface, APIs, and backend databases. Automated testing frameworks are leveraged to ensure quality, stability, and reliability of business processes and platform releases.

Roles & Responsibilities

- Develop and maintain UI automation frameworks using Playwright with TypeScript and Selenium WebDriver with Java.
- Design and execute automated end-to-end test scenarios covering critical business workflows and integrations.
- Implement parallel execution, reusable fixtures, and cross-browser validation within automation frameworks.
- Perform REST API validation using Postman and Swagger.
- Validate backend data using PostgreSQL and SQL queries.
- Manage test execution and defect tracking using Zephyr and JIRA.
- Utilize AI-driven testing methodologies for automated test generation, optimization, and debugging.
- Support release validation, production testing, defect troubleshooting, and regression cycles.
- Collaborate with developers, product owners, and business analysts to ensure full test coverage.

Environment

Playwright, TypeScript, Selenium WebDriver, Java, PostgreSQL, JIRA, Zephyr, Jenkins, Git, API Genie, MCP.

2] Organization Name – Tec Experts, Ashers & Aarons LLC

Client Name – Bank of America
Project – Enterprise Banking Application Testing
Project Duration – July 2025 – Mar 2026
Role/ Title – SDET Intern
Work – Remote, USA

Project Description

Supported quality engineering initiatives for enterprise banking applications involving UI, API, backend data validation, and integration testing. Contributed to automation framework development and software quality assurance activities across multiple release cycles.

Roles & Responsibilities

- Designed and maintained Selenium WebDriver automation scripts using Java.
- Executed functional, regression, integration, and end-to-end testing activities.
- Performed API validation using Postman and Swagger.
- Created reusable API test collections and validation utilities.
- Executed backend SQL validation to verify application integrity.
- Managed defects and test cases using JIRA, qTest, and Confluence.
- Enhanced automation frameworks using Page Object Model and Data-Driven approaches.
- Supported CI/CD automation execution using Jenkins and Git.
- Performed root cause analysis for automation and application failures.

Environment

Java, Selenium WebDriver, Postman, Swagger, SQL, Jenkins, Git, qTest, Confluence, JIRA.

3] Organization Name – Capgemini India Inc.

Client Name – USAA
Project – Guidewire PolicyCenter QA Automation
Project Duration – Sept 2021 – July 2023
Role/ Title – Senior Software Engineer (QA Automation)
Work – Hyderabad, India

Project Description

Guidewire PolicyCenter is a policy administration platform used for policy creation, endorsements, renewals, rating, and policy servicing. The application integrates with multiple systems and services to support insurance business processes while ensuring policy accuracy, rating compliance, and end-to-end transaction processing

 Copyright © 2016 Capgemini. All rights reserved.

Roles & Responsibilities

- Performed extensive Functional Testing and Regression Testing for Guidewire PolicyCenter applications across multiple releases and enhancements.
- Validated complete End-to-End PolicyCenter workflows, including policy creation, policy issuance, endorsements, renewals, and policy servicing transactions.
- Worked extensively on Out-of-Sequence (OOS) Transactions, validating business rules, policy versioning, transaction processing, and premium recalculations.
- Executed Rate Calculation Testing to verify premium calculations, rating rules, pricing factors, and policy validation logic.
- Developed, maintained, and executed API test scripts and test cases using Postman for validating backend service integrations.
- Performed API request and response validation, ensuring correct business logic implementation and data consistency across systems.
- Generated, analyzed, and validated payloads exchanged between integrated applications and backend services.
- Conducted payload testing and verification to ensure accurate transmission of policy, customer, and transaction data.
- Participated in defect investigation, root cause analysis, retesting, and regression validation cycles.
- Created Lucidchart process diagrams and workflow documentation to support business discussions, testing activities, and application understanding.
- Conducted client demonstrations and walkthrough sessions, presenting testing results, application functionality, and release validations to business stakeholders.
- Collaborated with Business Analysts, Developers, Product Owners, and QA teams to ensure complete test coverage and quality delivery.
- Participated in Agile ceremonies including Sprint Planning, Daily Standups, Defect Triage, Sprint Reviews, and Retrospectives.

Environment

Guidewire PolicyCenter, Postman, REST APIs, JSON Payload Validation, JIRA, qTest, Confluence, Lucidchart, SQL, Agile Scrum.

Education

Master of Science in Computer Science

Southeast Missouri State University, Missouri, USA (May 2025)

Certifications

- ACTIVATE AI Foundation Badge
- Claude Certified Associate

Additional Strengths

- AI-Driven Test Automation
- Framework Design & Enhancement
- API Validation & Integration Testing
- End-to-End Quality Engineering
- Financial Services Domain Experience
- Insurance Domain Experience
- Production Release Validation
- Defect Management & Root Cause Analysis
- Agile Delivery & Stakeholder Collaboration
